Windows Server 2012 R2, Windows Server 2012, Windows Server 2008 R2, or Windows Server 2008 with Remote Desktop Services (formerly known as Terminal Services) allow a server to host multiple, simultaneous client sessions. Remote Desktop uses Remote Desktop Services technology to allow a single session to run remotely. A user can connect to a Remote Desktop Session Host (RD Session Host) server (formerly known as a terminal server) by using Remote Desktop Connection (RDC) client software. The ...

Each user or device accessing a licensed Windows Server requires a Windows Server CAL or a Windows Server and a Remote Desktop Services (RDS) CAL. With the User CAL, you purchase a CAL for every user who accesses the server to use services such as file storage or printing, regardless of the number of devices they use for that access.

[What is Remote Desktop Services \(RDS\)? - Definition from ...](#)

Fit session to window determines how the session is displayed when the resolution of the remote desktop differs from the size of the local window. When enabled, the session content will be resized to fit inside the window while preserving the aspect ratio of the session. When disabled, scrollbars or black areas will be shown when the resolution and window size don't match. This setting is available in all modes.
